

Chemistry Controller

Pool Link 103
Fully Integrated Programmable Controller
Digital Display with LED Indicators
Proportional, Set Point and Manual Dosing
Lockouts with fail-safe Protection
Balance Water Function
pH Probe
ORP Probe (with ORP control)
Flow Indicators and Flow Switch Input

True Proportional Dosing

Poolink 100 series performs continuous monitoring and correction of pH and sanitizer according to your preset levels.

Operation and Maintenance

Reduction in the time spent manually testing and correcting controlling pool chemistry, freeing time for other duties. Operators often see reductions in chemical use of 20% to 40%. Maintaining the proper pH will help protect mechanical equipment and pool structures from corrosion and scaling

Flow Train

Comes complete with the Flow cell, PH probe, OPR probe, flow switch, 2 shut off valves and a spigot for water quality testing
